RE: Antibiotics in Animal Food

Dear Commissioner Henney:

As a member of the Center for Science in the Public Interest (CSPI), I urge you to save human lives by banning the use of medically useful antibiotics in animal feed. Adding antibiotics to feed in order to promote growth can make bacteria resistant to those antibiotics. That can leave physicians with no way to treat life-threatening bacterial infections in humans.

Why can't food animals be feed grains, grasses, natural food without hormones, antibiotics, ground-up sick and diseased animals, manure, etc.?

Sincerely,

Ellen L. Munoz

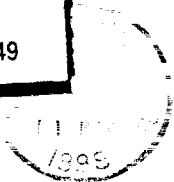

Member of The Humane Society of the United States
